

MS7625 (stainless steel top plate)

MS7600 SERIES **Horizon®**

Horizon® is a compact in-counter hands free laser bar code scanner designed with a dense 20-line scan pattern that provides fast, efficient throughput.

Each Horizon is equipped with an integrated EAS deactivation antenna. The EAS security tag, designed to reduce shrink, is deactivated and the bar code is scanned with a single pass. These simultaneous operations help improve operator comfort and increase throughput. To further enhance operator efficiency and productivity, Horizon is equipped with IR laser activation. This allows the user to "wake" the unit from a power save or sleep mode and read a bar code instantaneously, without any delay.

Each Horizon includes an RS232 auxiliary port that allows for hand held bar code scanners to be connected providing easy scanning of bulky,

oversized objects. Other peripherals such as check readers or magnetic stripe readers can also utilize the flexibility of the auxiliary port. The Horizon also offers multiple interfaces and data editing making it compatible with almost every POS system on the market today.

The combination of performance, ruggedness, and a myriad of features make the Horizon an ideal choice for grocery, supermarket, retail, coupon redemption, and a multitude of other applications.
